Horizon 2020 Framework Programme

Legal Entity and Bank Account validations tasks will experience issues in the Participant Portal Grant Management Services on **Friday, 30.11.2018, between 07:30 and 08:10 CET.** We apologies for any inconvenience this may cause.

Horizon 2020 Research & Innovation

Horizon 2020 is the EU funding programme for research and innovation

Horizon 2020 programme is running from 2014 to 2020 with a €80 billion budget. It provides research and innovation funding for multi-national collaboration projects as well as for individual researchers and supports SMEs with a special funding instrument.

For more information on Horizon 2020, please see the H2020 web site.

Topic Description

Specific Challenge:

The market for deep renovation of buildings needs to be transformed in terms of technologies, processes and business models. More action is needed for Europe to achieve the higher rates of buildings renovations and spread clean energy technologies in the existing European building stock in order to meet long-term climate and energy targets. In particular, deep renovations need to become more attractive to all relevant stakeholders, more reliable in terms of performance, less disruptive for occupants (especially in residential buildings), less time-consuming, less energy-intensive from a life cycle perspective, more environmentally friendly regarding applied materials and more cost-effective, but also enabling new functions the buildings will play in the energy system of the future (flexibility, storage and RES generation). There is a need to demonstrate and roll out holistic consumer-centred solutions that involve the whole value chain, ensuring high levels of comfort and a high quality of the indoor environment.

ULTRACONTROL Ultra-low cost orbit transfer and orbit control for future libration point missions

Objective

In January 2014, the ISEF participants insisted on the importance of "fostering international cooperation for additional space exploration projects". The partners of IRENA (International Re-Entry demoNstrator Action), including major space agencies involved in ISEF and ISECG, are convinced of the need for demonstrators in atmosphere entry/re-entry and of the potential for international cooperation in this area.

IRENA mainly aims at:

- creating a cluster of European and international stakeholders to study two types of demonstrators aimed at developing entry/re-entry technologies and suitable for other enabling technologies
- jointly defining two technology demonstrator projects relevant for international cooperation
- contributing to a European position for ISEF and
- disseminating the results and preparing the next steps.

To achieve these objectives, IRENA will rely on an international and complementary team: four major European and international space agencies (CNES, DLR and JAXA as beneficiaries and NASA as a 3rd party), the two European industry leaders in entry/re-entry and space exploration (Astrium, Thales Alenia Space) and a research institute expert in dissemination and exploitation. IRENA will build on a cooperative approach to jointly define the projects, on feasibility and cost assessment studies and on implementation assessment studies (governance, funding, international cooperation). Five workshops including one in Japan, the USA and two based on Concurrent Engineering will be used to support the work.

IRENA's objectives have been chosen to explicitly meet the main work programme's requirements i.e. to be in line with ISEF recommendations, to involve international countries active in space exploration, to

The image shows a screenshot of the CORDIS website. At the top left, there are logos for the European Commission and CORDIS (EU research results). The top right features a language selector set to 'English EN' and a search bar, which is circled in red. Below the header is a navigation menu with links for HOME, RESULTS PACKS, RESEARCH*EU MAGAZINES, NEWS & EVENTS, PROJECTS & RESULTS, and ABOUT US. A 'Sign in' button is also present. The main content area features a large news article titled 'Upcoming international conference to address new challenge in wastewater treatment'. The article text states: 'At the 2019 International Water Association Resource Recovery (IWARR) Conference, over 300 experts and practitioners will present ideas and innovations to help the environment. The main focus will be on recovering resources from urban and agricultural wastewater.' A blue button labeled 'Read the news article' is positioned below the text. To the right of the main article is a sidebar with several smaller news items, including 'CORDIS RESULTS PACKS' and 'RESEARCH*EU MAGAZINE'. A white callout box with a pointer to the search bar contains the text: 「Drynet」と入力。 (Input 'Drynet').

DRYNET Setting an interdisciplinary/sectorial/international research network to explore dry storage as an alternative strategy for cells/germplasm biobanking

ID: 734434 From: 1 March 2017 to 28 February 2021

The number of biobanks for diagnostic/clinical/biodiversity preservation purposes is increasing exponentially, representing an economic burden for the EU. Cryopreservation (Liquid Nitrogen LN) is the only cells/gametes long-term repository method. LN storage i...

Horizon Dashboard

The Horizon Dashboard is an intuitive and interactive knowledge platform offering a user-friendly public access to statistics and data on EU research and innovation. It offers:

- Easy access to overview and detailed information on proposals, funded projects and project results, notably reported IPRs and scientific publications,
- Views on specific aspects e.g. the Seal of Excellence, the European Innovation Council
- Intuitive functions for filtering and drilling down, allowing analysis by geographical location, research thematic area, organization types etc.
- Functions for data export, story-building and bookmarking – log in here to access full Dashboard functionalities

The screenshot displays a web application interface for H2020 Projects. The top navigation bar includes a search icon, a list icon, and the text "H2020 Projects". A red circle highlights the "H2020 Projects" tab in the top navigation bar. The main content area is divided into several sections:

- H2020 Signed Grants:** 20,01% of H2020
- H2020 EU Contribution:** 00,00% of H2020
- Signed Grants / Participant EU Contribution by Project Signatur...:** A bar chart showing two bars with values 1 and 1.
- Top Funded Projects:** A table with columns for Project Title, Project Acronym, and Thema.

The "H2020 Projects" dashboard tile is highlighted with a red circle. It contains three sub-tiles: "Summary", "H2020 Projects", and "H2020 Participations". The "H2020 Projects" tile is the central focus of the dashboard.
