HOLISTIC ASSESSMENT

←プロジェクト名

Fact Sheet

Project description

DE EN ES FR IT PL

プロジェクト名→ Making better decisions for more sustainable food production and consumption patterns

プロジェクトの要旨→ About 88 million tonnes of food are wasted across the entire EU supply chain every year. Assessing the economic, environmental and social impacts of this major issue is difficult for several reasons. The EU-funded ToNoWaste project aims to implement a multi-stakeholder and interdisciplinary assessment approach that takes into account agronomic, economic, environmental and business model challenges, as well as psychology, law and social innovation aspects. The project will conduct research and use past findings to identify social, technical, environmental, economic, political, legal, ethical and demographic drivers and hindrances. It will also propose thorough food waste prevention and reduction assessment solutions by working together with current research and development actions.
