トピックの概要、課題等

ExpectedOutcome:

Projects' results are expected to contribute to the following outcomes:

- Improved real-time detection, tracking and analysis of different situations, incidents and risks (including the location and well-being of first responders)
- More targeted actionable intelligence and more efficient command operations due to the fast analysis of different information sources
- Enhanced European and global interoperability for different types of first responders (e.g. firefighters, medical responders, police, civil protection)
- Availability of first responder solutions that are oriented on internationally defined requirements and recognised practices, and thus can be used with different national systems and equipment

Destination

Disaster-Resilient Society for Europe

This Destination supports the implementation of international policy frameworks (e.g. the Sendai Framework for Disaster Risk Reduction, the Paris Agreement, Sustainable Development Goals), **EU disaster risk management policies** tackling natural and man-made threats (either accidental or intentional), **European Green Deal** priorities including the new EU **Climate Adaptation Strategy** [[COM(2021) 82 final., as well as the **Security Union Strategy**[[COM(2020) 605 final.]] and the **Counter-Terrorism Agenda**[[COM(2020) 795 final.]] .

The world and our societies are facing growing risks from anthropogenic and natural hazards, which call for enhanced capacities in risk and resilience management and governance[[Overview of natural and man-made disaster risks the European Union may face, SWD(2020) 330.]], including instruments for better prevention and preparedness, technologies for first and second responders[[A "second responder" is a worker who supports "first responders" such as police, fire, and emergency medical personnel. They are involved in preparing, managing, returning services,

Horizon Dashboard

The Horizon Dashboard is an intuitive and interactive knowledge platform offering a user-friendly public access to statistics and data on EU research and innovation. It offers:

Easy access to overview and detailed information on proposals, funded projects and project results, notably reported IPRs and scientific publications,
Views on specific aspects e.g. the Seal of Excellence, the European Innovation Council
Intuitive functions for filtering and drilling down, allowing analysis by geographical location, research thematic area, organization types etc.
Functions for data export, story-building and bookmarking – log in here to access full Dashboard functionalities.

Horizon Results Platform

Whether you are a policy-maker, an investor, an entrepreneur, a researcher, an innovation, legal, business development or financing expert, or any interested citizen, this is the place where you can discover the wealth of EU-funded research results and get in contact with their creators.

Horizon Results Booster

The Booster addresses projects eager to go beyond their Dissemination and Exploitation (D&E) obligations under Horizon 2020.

TOWARDS A NEW ZERO FOOD WASTE MINDSET BASED ON HOLISTIC ASSESSMENT

←プロジェクト名

Project description

プロジェクト名→

Making better decisions for more sustainable food production and consumption patterns

プロジェクトの要旨→

About 88 million tonnes of food are wasted across the entire EU supply chain every year. Assessing the economic, environmental and social impacts of this major issue is difficult for several reasons. The EU-funded ToNoWaste project aims to implement a multi-stakeholder and interdisciplinary assessment approach that takes into account agronomic, economic, environmental and business model challenges, as well as psychology, law and social innovation aspects. The project will conduct research and use past findings to identify social, technical, environmental, economic, political, legal, ethical and demographic drivers and hindrances. It will also propose thorough food waste prevention and reduction assessment solutions by working together with current research and development actions.
